

# Ease & TRAXPayroll Integration Overview

Ease and TRAXPayroll have partnered to make benefits and payroll easy.

## Simple Setup

When setting up your group's TRAXPayroll account, employee demographic, compensation, benefit deductions, and onboarding data will be synced from Ease to TRAXPayroll, eliminating the need for duplicate data entry.

## Always in Sync

Each pay period, Ease automatically sends deduction changes and, if tracked in Ease, time off taken to TRAXPayroll while TRAXPayroll sends any demographic file changes to Ease so your accounts are always up to date.

## Paystubs in Ease

With Ease's TRAXPayroll integration employees can view their paystubs straight from their Ease account.

## How To Activate

This integration is only available for businesses already using TRAXPayroll. To get started with this integration, please reach out to your TRAXPayroll account manager directly.
