

Ease & Covered California for Small Business (CCSB) have connected to make benefits easier for small businesses.

Electronic submission for your Covered California for Small Business (CCSB) enrollments

Instant Setup with Plan Libraries

Online CCSB enrollment is now available through Ease. The connection means instant set up with Plan Libraries, making rates, benefits, plan summaries and other details automatically accessible in your Ease account.

Upload Documents for E-Submission

With the connection, CCSB accounts are automatically updated with enrollment data and attachments, such as de-9c, payroll, and other company documents required for company underwriting. Attachments can be uploaded into the secure documents section of Ease and attached to the enrollment submission.

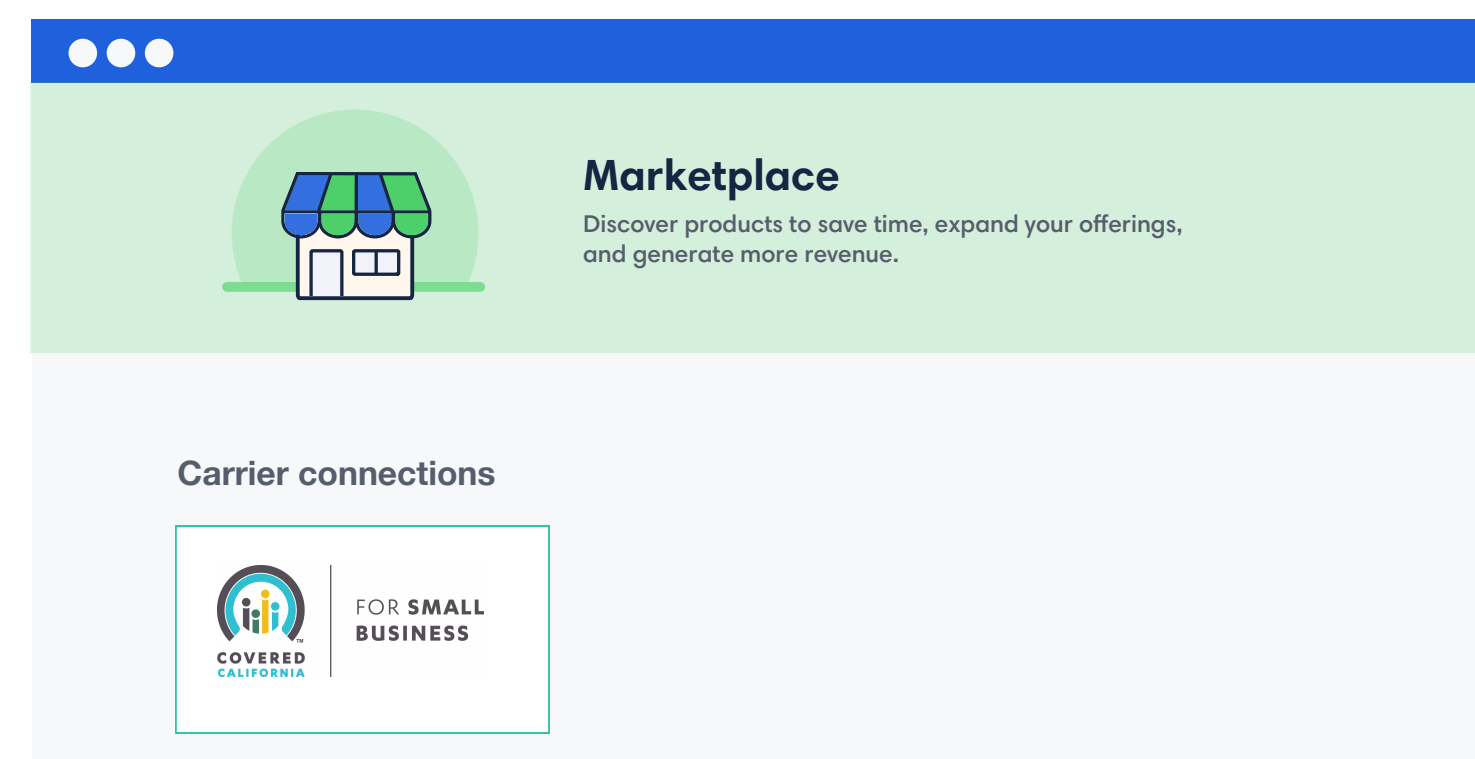

Electronic Submission to CCSB

CCSB plan libraries are available in Ease, which include rates and plan info. Submit and send required enrollment documents through Ease in a secure file transfer.

How to activate

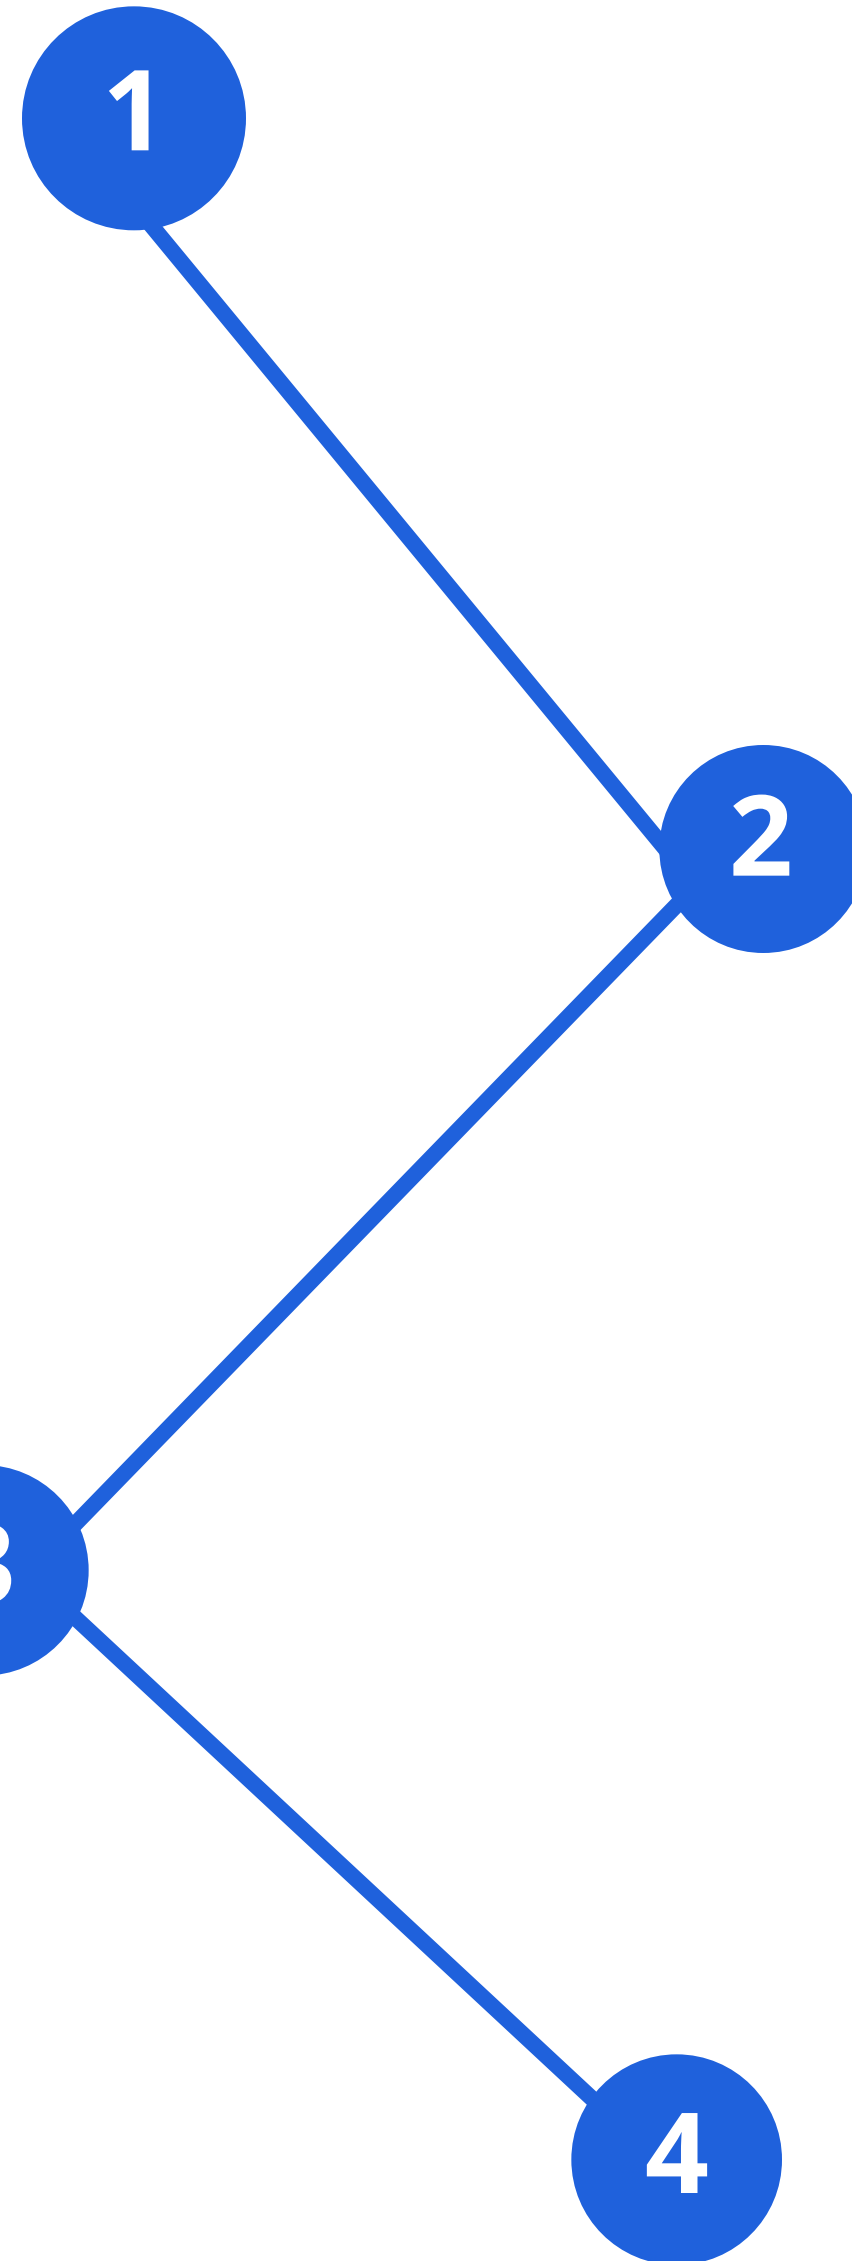

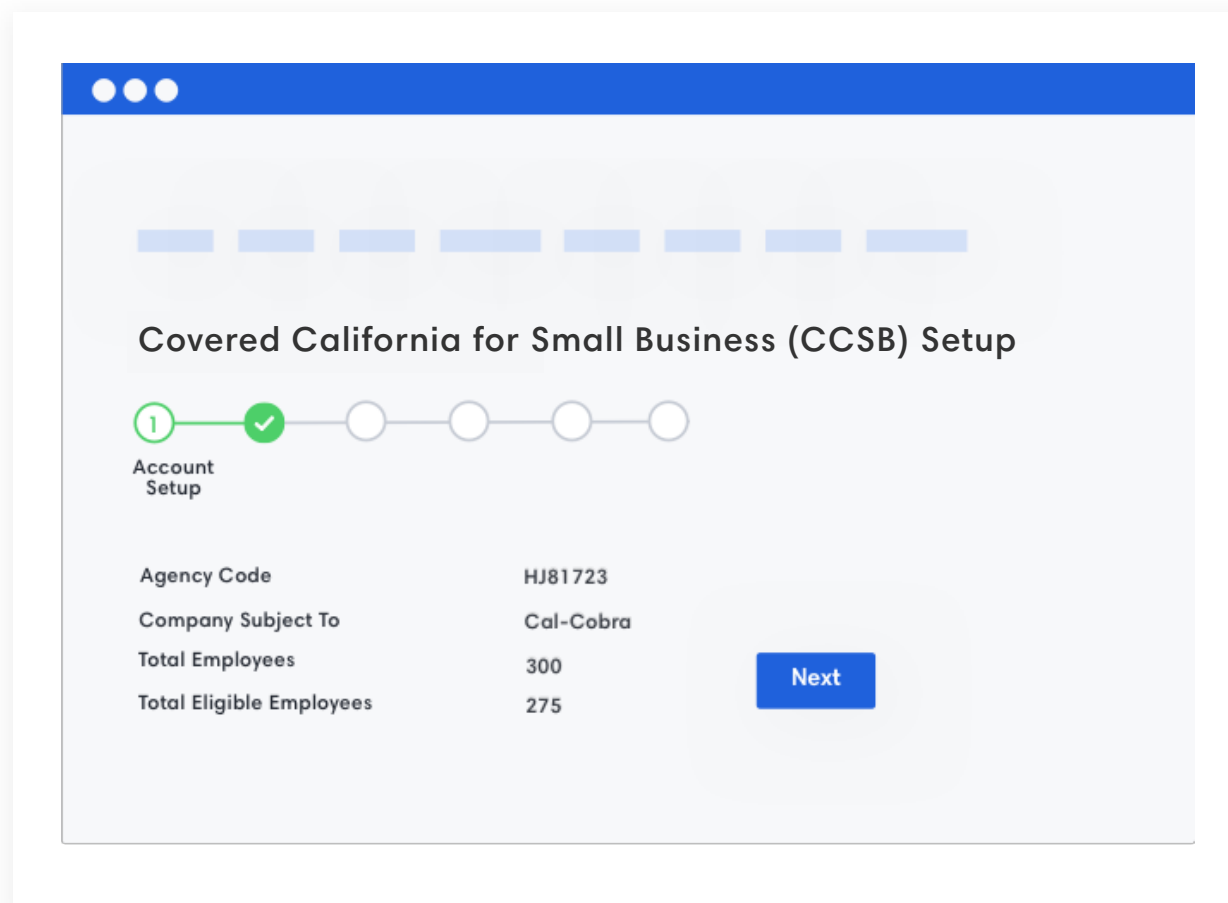

Enable

in your Marketplace.

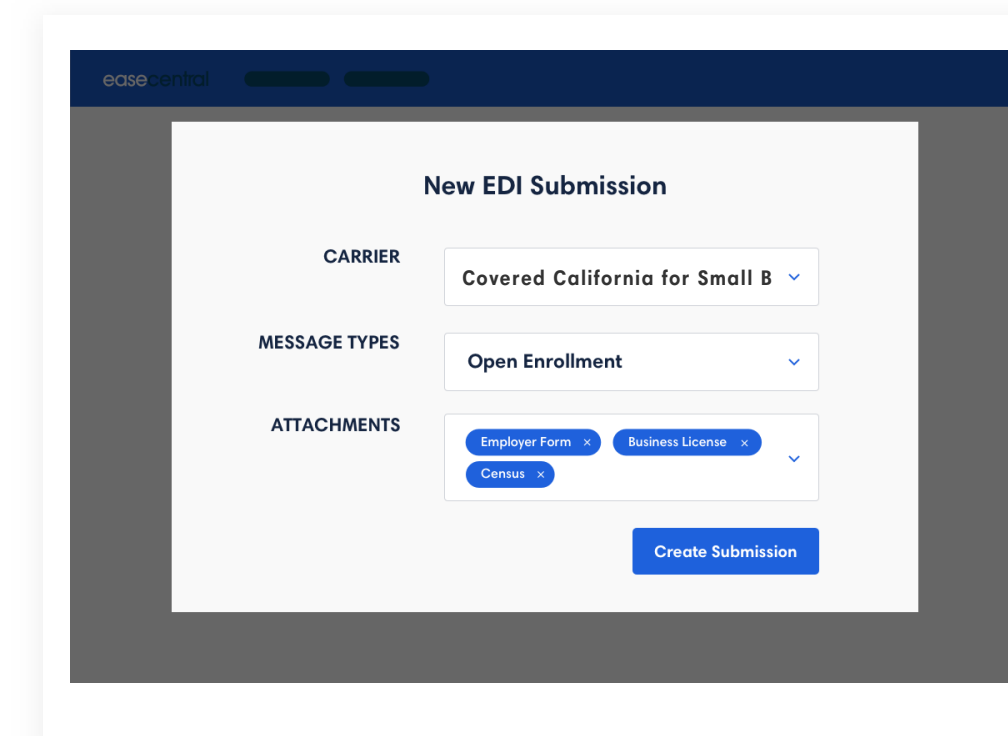

How it works

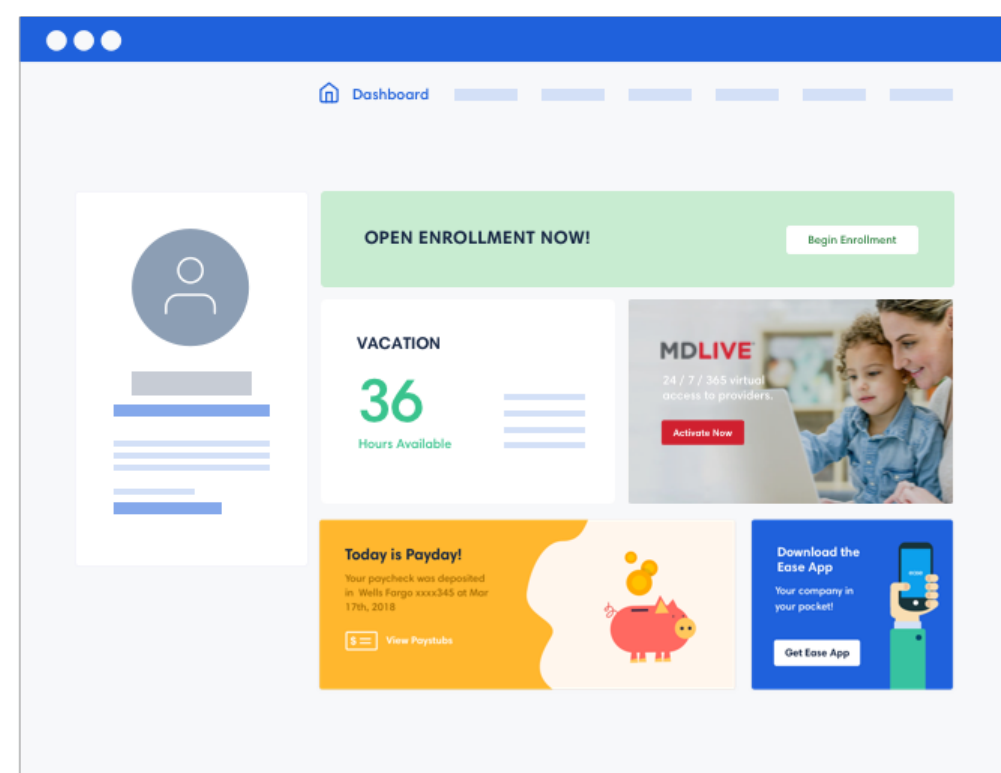

Enable E-submission in the Benefits > connections section of Ease to upload required eligibility documents. Configure your CCSB plans with the connection set up wizard.

Once added, select CCSB as the Carrier, SELECT EDI for Submission Type, and attach required documents. This allows the enrollment to be submitted entirely online.

Employees can enroll through the same online enrollment experience as a medical plan currently in Ease.

Once enrollment is complete, Ease automatically attaches and submits all enrollments to CCSB's system. You can monitor your submission status by logging into your CCSB account.
