

MINIMIZE | MONITOR | MANAGE

CYBERSCOUT[®]

CyberScout offers timely and valuable protection for your employees.

Selecting voluntary benefits has become a balancing act for employers. These days, employees are cost-conscious and selective about benefits. At the same time, benefits that offer real value can help you attract and retain your best employees.

About 70% of employers plan to offer identity protection by 2018.* Don't be left behind.

That's why offering your employees identity theft protection services from CyberScout is such a win-win.

Identity theft and fraud are a perpetual concern for employees. You can help build loyalty—and improve productivity—by offering valuable protection from a trusted provider.

CyberScout, established in 2003, is a proven industry leader. We're committed to providing innovative identity management services that **minimize** threats, **monitor** personal information and **manage** recovery for your employees.

And, we're just as committed to helping you recruit, retain and engage employees, while also increasing productivity. CyberScout is one of the only identity management carriers with a global presence and an award-winning customer service team, offering you peace of mind that your employees' cyber wellness is in good hands.

Roughly 92 percent of all human resources and benefits managers know at least one employee who has experienced identity theft.** Work with us to beat the odds for your employees and keep them safe.

Your success is our success.

When you offer your employees CyberScout identity theft protection, you'll experience unsurpassed service and support.

- + High-quality, reputable products from a leader in the identity management industry.
- + Marketing support to assist with employee education and engagement.
- + Seamless integration with benefit administration platforms.
- + Access to experienced fraud specialists 24/7.

** "7 Voluntary Benefits to Maintain Employee Productivity," June 22, 2017, BenefitsPro.

Dangerous times call for dependable solutions. Your employees can count on CyberScout.

Cyber crime is everywhere. More than **3.7 million records are exposed daily** in data breaches. And identity theft claims more than **15 million victims a year**, resulting in **\$16 billion in losses**.*

We provide identity management services that offer your employees valuable protection and support—24 hours a day—to keep them ahead of threats.

Our proven experience turns the possibility of threats into an opportunity for you to offer the best proactive education, monitoring and cyber protection.

Identity protection for every stage of life

Life's most precious moments and events—attending college, getting married, having children, buying a home and even retiring—create new risks and exposures. CyberScout offers proactive measures to educate employees about hidden threats, as well as tools to help protect against them. For example, our Password Protector is an easy way to help them keep track of account credentials and reduce hacking risks. With this digital tool, we help ensure that employees' most important accounts and information are protected with military grade security.

If an incident does occur, employees have prompt, unlimited access to a dedicated fraud specialist who works with the employee 24/7 to answer questions and help them resolve any issues.

Proactive fraud, credit and social media monitoring

CyberScout identity monitoring reviews a broad spectrum of activities—across both credit and noncredit data—to identify potential patterns that might signal a breach. Our solutions scour the internet, as well as public and private databases, for the possible misuse of employee identities and credit data before fraud occurs. We also offer social media monitoring to employees and their families so they can manage their online reputation, as well as protect against fraud.

When potentially fraudulent activity is detected, employees receive immediate alerts and access to 24/7 resolution support from our trusted, experienced fraud resolution team.

Identity protection is nationally recognized as critically important—it's now tax-free for all employer-paid benefits.

Depend on us for innovative benefit offerings that really matter to your employees.

It's an unfortunate fact: Incidences of identity theft increase every year. And, when employees experience fraud, it can have a significant impact on your bottom line.

- + Identity theft can take an average of **165 work hours to resolve**. That's **more than four work weeks!**
- + Identity theft victims are **absent from work five times more** than the average employee.
- + Identity theft victims are **four times more likely to use medical benefits** and **use twice as much sick time**.*

CyberScout is on the front line of today's battle against identity and data theft—a vigilant, compassionate partner that delivers added value to you and your employees. We combine on-the-ground experience with high-touch personal service to help you deliver innovative benefits designed for the lifetime of your employee.

Count on us for the quality and excellence your employees deserve.

CyberScout covers **17.5 million individual households** and more than **770,000 businesses** worldwide. Make sure your employees have the same protection.

Our **660 partners** include:

- + **16 of the top 20** of the property and casualty insurance marketplace in the U.S.
- + **6 of the 7** top Canadian insurers
- + Major credit unions, banks and **Fortune 500** companies
- + Leading organizations across Canada and Europe

Don't take our word for it. CyberScout achieves 99% and higher customer satisfaction ratings.

CyberScout is recognized for leadership and innovation by national and international organizations.

CyberScout is the gold standard for identity and data defense services—from proactive protection and education, to online monitoring and security tools, to successful resolution—for individuals and corporate clients. Discover how CyberScout can help you attract and retain employees while you help protect them from cyber theft and fraud.
